

# CDB PDF Export on Pipeline Execution

Download a PDF report that has pipeline-execution security data

[Harness API docs](#) - Customer facing API docs

## Where should my PDF Export go?

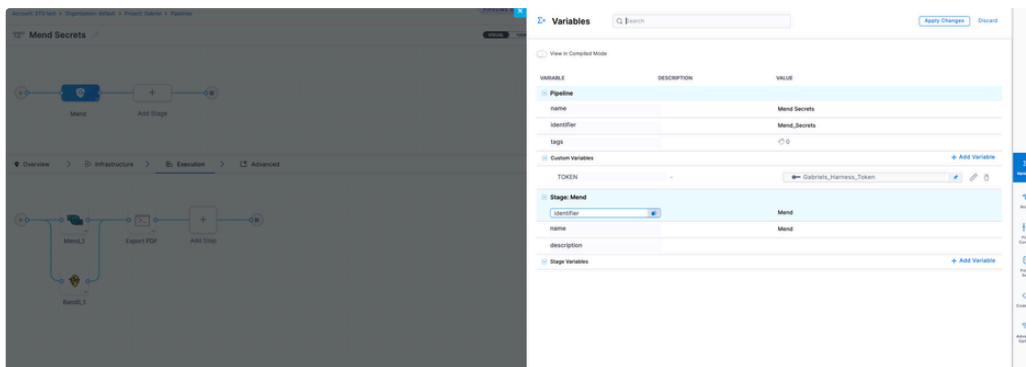

The PDF export should occur after all the security steps have been completed. This way the export can attach all the vulnerabilities found for each scan.

## Steps

Create a Harness token - [Manage API keys | Harness Developer Hub](#)

Add a pipeline variable to the Harness token

Example Yaml, which can be copied into a pipeline

- Modify the value for DASHBOARD\_ID

- Verify that the TOKEN variable referenced the pipeline variable created for the Harness token

```
1      - step:
2        type: Run
3        name: Export PDF
4        identifier: Export_PDF
5        spec:
6          connectorRef: account.harnessImage
7          image: curlimages/curl
8          shell: Sh
9          command: |-
10             EXECUTION_ID=<<+pipeline.executionId>
11             ACCOUNT_ID=<<+account.identifier>
12             TOKEN=<<+pipeline.variables.TOKEN>
13             PIPELINE=<<+pipeline.name>
14             DASHBOARD_ID=30442
15             echo 'Sleeping for a couple seconds'
16             sleep 20
17             echo 'Scheduling Report Generation'
18
19             curl --location "https://app.harness.io/dashboard/schedules/run_once?
accountId=${ACCOUNT_ID}" \
20             --header "x-api-key: ${TOKEN}" \
21             --header 'Accept: */*' \
22             --header 'Content-Type: application/json' \
23             --data-raw "{
24                 \"dashboard_id\": \"${DASHBOARD_ID}\",
25                 \"destination_emails\": \"hello_world@harness.io\",
26                 \"file_type\": \"wysiwyg_pdf\",
27                 \"name\": \"${PIPELINE}:${EXECUTION_ID}\",
28                 \"filters\": \"Execution=${EXECUTION_ID}\"
29             }"
30         failureStrategies:
31           - onFailure:
32             errors:
33               - AllErrors
34             action:
35               type: Ignore
36         when:
37           stageStatus: Success
```
